

REMARKS

Submitted herewith as Attachment A is an English translation of the international application as originally filed. The entire specification and claims consisting of pages 1-71 of the English translation have been replaced with the substitute specification and claims consisting of pages 1-56 and including claims 1-10, which substitute specification and claims correspond to the substitute specification and claims presented during prosecution of the international application by way of amendment under PCT Article 34 filed on February 19, 2001.

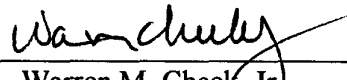

To the substitute specification, amendments have been effected to note the national stage status of the present application. In addition, the multiple dependencies of the claims have been removed to reduce the PTO filing fee, as well as to remove the improper multiple dependencies.

Attached hereto is a marked-up version of the changes made to the specification and claims by the current amendment. The attached pages are captioned "**Version with markings to show changes made**".

Favorable action on the merits is solicited.

Respectfully submitted,

Masaaki YOSHIMARU et al.
